

Stainless Steel-Locking pins

with axial lock (magnetic)

SPECIFICATION

Pin
Stainless Steel AISI 303

Knob
Plastic Technopolymer (Polyamide PA)

- black-grey
- temperature resistant up to 80 °C

Retaining magnet
Neodymium, iron, boron

INFORMATION

GN 124.1 Stainless Steel-Locking pins are used for quickly fixing, connecting and locking various parts and workpieces made of magnetic materials.

A neodymium magnet is recessed into the underside of the bolt and axially retains the bolt in its inserted position. High-quality surfaces with perpendicular locating holes promote magnetic flux to produce excellent axial retention.

The rated shear stresses of the bolt cross-section are theoretical guide values only and do not constitute any warranty. They constitute no general warranty of quality and condition. The user must determine from case to case whether a product is suitable for the intended use.

- Range of locking pins (see page 868)

ACCESSORY

- Ball chains GN 111 (see page 904)
- Stainless Steel-Ball chains GN 111.5 (see page 905)
- Retaining cables GN 111.2 (see page 906)
- Spiral retaining cables GN 111.4 (see page 908)

TECHNICAL INFORMATION

- Stainless Steel characteristics (see page A26)
- Plastic characteristics (see page A2)

Application example

GN 124.1

STAINLESS STEEL
